1. Between 17 and 27 November 1950, four buildings and the officers' billets of the Flandern Kaserne in Eilenburg (N 52/E 32) were occupied to capacity, while one building was still vacant. Soldiers wearing coveralls were frequently observed in the former forge in the eastern section of the former horse stable. Source believed that there was a workshop. Guns were seen in the garage which paralleled Walter Rathenaustrasse. A gun parked at the garage on 26 November had pneumatic tires, and a barrel without a muzzle brake. The barrel measured about 1½ meters from the shield forward and was about 1 meter from the ground when in a horizontal position. The pneumatic recuperator was above the gun barrel. The square-shaped trails were about 2 meters long. Gate guards at the installation wore red-bordered black epaulets.

- * [redacted] Comment. According to previous information, the former Artillerie Kaserne, also called Flandern Kaserne, quarters elements of the unidentified artillery regiment of the 8th Gds -ocz Div. According to the description, the gun was probably a 122-mm field howitzer, model 1938.
